COLONEL DAVID B. MITCHELL  
SUPERINTENDENT

December 20, 1996

The Honorable Parris N. Glendening  
Governor, State of Maryland  
State House  
Annapolis MD 21401

Dear Governor Glendening:

Pursuant to Article 88B, Sections 9 and 10 of the Annotated Code of Maryland, the Maryland State Police respectfully submits the 1995 Uniform Crime Report, Crime In Maryland. This publication represents the Twenty-first Annual Report prepared by the Maryland Uniform Crime Reporting Program.

The data was compiled from monthly reports forwarded to the Central Records Division, Maryland State Police, by all law enforcement agencies throughout the State of Maryland. Every effort has been made to verify the accuracy and completeness of the published information.

Crime In Maryland will assist law enforcement personnel and members of state government by providing valuable information in planning crime prevention programs, assessing crime patterns and developing legislation to combat criminal activity. As always, I am readily available should you have any comments or concerns.

Sincerely,

David B. Mitchell  
Superintendent

# INTRODUCTION

## BACKGROUND

The Maryland Uniform Crime Reporting (UCR) Program is one of the measures that has been taken in the establishment of an effective Criminal Justice Information System (CJIS) for the State. This particular phase of the CJIS focuses on the incidence of crime and law enforcement, by establishing a method to collect, evaluate and process uniform statistical data on crime statewide. The Maryland UCR Program provides the means to forward more valid data to the Federal Bureau of Investigation from a single agency and also to consolidate it into an annual report entitled Crime in Maryland.

## NATIONAL UNIFORM CRIME REPORTING PROGRAM

The counterpart of the Statewide UCR Program is the National UCR Program which is under the direction of the Federal Bureau of Investigation. The National Program resulted from a need for a uniform compilation of crime statistics nationwide. Uniform Crime Reports were first collected in 1930 after being developed by a committee of the International Association of Chiefs of Police. The IACP continues to serve in an advisory capacity to the FBI in the current operation of the Program.

Crime statistics voluntarily submitted by individual law enforcement agencies from all fifty states are presented annually in the FBI's Uniform Crime Reports Publication entitled Crime in the United States.

## MARYLAND UNIFORM CRIME REPORTING PROGRAM

The FBI has actively assisted individual states in the development of State UCR Programs compatible with the National Program. Maryland took advantage of this assistance in 1972 and was able to develop its own program by 1975.

The responsibility and authority for the collection and dissemination of UCR data was assigned to the Maryland State Police, Department of Public Safety and Correctional Services under Article 88B, Sections 9 and 10, of the Annotated Code of Maryland.

The Maryland Uniform Crime Reporting Program became operational January 1, 1975. This program consists of the uniform classification, review, compilation and analysis of crime statistics reported by all law enforcement agencies of the State pursuant to the guidelines and regulations prescribed by law.

## PURPOSE AND OBJECTIVES

In keeping with the recommendation of the President's Commission on Law Enforcement and the Administration of Justice, the Maryland UCR Program was planned for eventual growth into a complete and integrated offender based Criminal Justice Information System. Under this program, each offender arrested in Maryland will be tracked through the entire criminal justice system from time of arrest, through the courts, to the correctional system where their exit (parole, expiration of sentence, etc.) will be recorded. In this manner, a complete "criminal history" on individual offenders will be available for use by the police, courts and correctional agencies in Maryland. In addition, statistical data derived from the CJIS Program will provide assistance in determining the overall efficiency of the Criminal Justice System in Maryland and will make effective management studies possible.

The fundamental objectives of the Maryland UCR Program are:

1. Inform the governor, legislature, other governmental officials and the public as to the nature of the crime problem in Maryland, its magnitude and its trends.
2. Provide law enforcement administrators with criminal statistics for administrative and operational use.
3. Determine who commits crimes by age, sex, race and other attributes in order to find the proper focus for crime prevention and enforcement.
4. Provide base data and statistics to measure the workload and effectiveness of Maryland's Criminal Justice System.
5. Provide base data and statistics to measure the effects of prevention and deterrence programs.
6. Provide base data and statistics for research to improve the efficiency, effectiveness and performance of criminal justice agencies.
7. Provide base data to assist in the assessment of social and other causes of crime for the development of theories of criminal behavior.
8. Provide the FBI with complete UCR data to be included in the national crime reports.

## REPORTING PROCEDURES

Under the Maryland UCR Program, law enforcement agencies are required to submit specified Uniform Crime Reports. The necessary information for each of the required reports is gathered from each agencies record of complaints, investigations and arrests.

Crime data and information is submitted by state, county and municipal law enforcement agencies monthly on the number of offenses known to them in the following crime categories:

- (1) Criminal Homicide
- (2) Forcible Rape
- (3) Robbery
- (4) Assault
- (5) Breaking or Entering
- (6) Larceny
- (7) Motor Vehicle Theft
- (8) Arson\*

The count of offenses is taken from the record of complaints received by law enforcement agencies from victims, witnesses, other sources or discovered by them during their own operation. Complaints determined by subsequent investigation to be unfounded are eliminated from count. The resulting number of "actual offenses known to law enforcement agencies" in these crime categories are reported without regard for whether anyone is arrested, stolen property is recovered, local prosecutive policy or any other consideration.

Reported offenses are recorded by the municipality and county in which they occur. Municipal law enforcement agencies report those crimes which occur within the cities and state. County agencies report those crimes which occur in the counties outside the cities.

A supplemental report is also submitted each month showing the value of stolen and recovered property, the type of property and the type of offense within a crime category in which it was taken. This report also shows the number of stolen vehicles recovered locally and by other jurisdictions. In addition, each agency reports the number of persons arrested by them or other agencies for crimes which have occurred within their jurisdiction. The arrest report also shows the age, sex and race of those arrested and the disposition of juveniles by the arresting agency. When applicable, supplemental reports are submitted regarding the persons, weapons and circumstances, etc., involved in homicides, spousal or officer assaults and "carjackings".

In addition, police employee data is collected on an annual basis.

## VERIFICATION PROCESS

A major concern in the collection of crime statistics for law enforcement agencies throughout the state is the uniformity and accuracy of data received. Program aides such as guides and instructional classes do not necessarily guarantee the accuracy of the reports submitted by the contributors, therefore, additional controls are necessary.

\*Monthly arson reports are submitted for law enforcement agencies by the State Fire Marshal's Office and designated county agencies.

Each report received by the UCR section is recorded, examined and verified for mathematical accuracy and possibly more important for reasonableness. The verification process includes numerous checks to ensure the validity of information. The elimination of duplicate reporting by individual contributors receives particular attention. Minor errors are corrected by telephone contact with the contributors. Substantial variations and errors are adjusted through personal contacts. The personal contacts are invaluable to the accuracy and quality of reporting. Field Records Representatives are engaged in a constant educational effort and as such, provide a vital link between the UCR Program and the contributor.

## POPULATION DATA

The computation of crime rates as they appear in this report by municipality, county and state are based on the latest available population estimates for the year as provided by the Federal Bureau of Investigation through the cooperation and assistance of the United States Bureau of Census.

## LIMITATIONS OF A UNIFORM CRIME REPORTING PROGRAM

Information currently collected by the Maryland Program is generally the same as that gathered by the National System and the methods of classifying and scoring offenses and arrests are the same. This readily enables comparisons with other states and with the nation, as a whole. However, there are limitations to the information collected which should be clearly understood before any conclusions are drawn from the UCR data presented in this report.

The main goal of the UCR Program is to furnish police administrators with a measure of their activities and operational problems as indicated by the number of reported offenses, arrests, clearances, etc.

A first step in the control of crime is to ascertain the true dimensions of the problem. However, present statistics as gathered by the UCR Program measure neither the real incidence of crime or the full amount of economic loss to victims. Information regarding number of offenses, clearances, value and type of property stolen and recovered property are collected only for the eight Part I offenses. For Part II offenses the only information submitted is the number of arrests for these crimes. Consequently, there is no record of the actual number of these offenses occurring, or is there a calculation made for property loss.

The Crime Index does not explicitly take into account the varying degrees of seriousness of its seven components (excluding arson). Each crime receives the same weight as it is added to the index, consequently, an auto theft is counted the same as a murder and an aggravated assault is weighed equally with an attempted breaking or entering. Any review of crime must consider the volume, rate and

trend of each offense that comprises the index and the relationship between these seven crimes\*.

The Maryland and National Uniform Crime Reporting Programs are designed to measure offenses committed and persons arrested. Difficulties can arise if this distinction is not kept clearly in mind. Crimes relate to events, arrests relate to persons. Unlike traffic violations where there is usually one event, violation and offender, a single criminal act can involve several crimes, offenders and victims. Relating specific crimes to a criminal or offense to evaluate characteristics of those arrested, is generally beyond the scope of the present Uniform Crime Reporting System.

Juvenile crime and arrest statistics, because of their nature, are another area of misunderstanding. Many juvenile offenders are handled informally, as a consequence, inaccurate or incomplete recording of the event or action may result. Procedures for handling juveniles vary between departments more so than the handling of adult offenders. Furthermore, the degree of juvenile involvement in cleared offenses is probably seriously misunderstood because the juvenile clearance indicator is recorded only when juveniles are exclusively involved. When both adults and juveniles are subjects in a clearance, the juvenile participation is not reported.

The preceding comments should not be viewed as an indictment of the Uniform Crime Reporting Program which, admittedly, is designed for the operational requirements of law enforcement agencies. While the current method of gathering and reporting crime and arrest data provide a less than complete picture of criminality in our society, the FBI has designed the National Incident Based Reporting System to address these limitations and is in its early stages of implementation nationally.

\*Arson is not used at this time in computing the Crime Index.

# CRIME FACTORS

Statistics compiled under the Uniform Crime Reporting Program from data submitted by the law enforcement agencies of Maryland projects a statewide view of crime. Awareness of the presence of certain crime factors which may influence the resulting volume and type of statistics presented is necessary if fair and equitable conclusions are to be drawn. These crime influencing factors are present to some degree in every community, and their presence affects in varying degrees the crime experience of that community. Attempts at comparison of crime figures between communities should not be made without first considering the individual factors present in each community.

Crime, as an outgrowth of society, remains a social problem of grave concern, and the police are limited in their role to its suppression and detection. As stated by the President's Commission on Law Enforcement and Administration of Criminal Justice in their report "The Challenge of Crime in a Free Society" (1967 - Page 92):

"But the fact that the police deal daily with crime does not mean that they have unlimited power to prevent it, or reduce it, or deter it. The police did not create and cannot resolve the social conditions that stimulate crime. They did not start and cannot stop the convulsive social changes that are taking place in America. They do not enact the laws that they are required to enforce, nor do they dispose of the criminals they arrest. The police are only one part of the criminal justice system; the criminal justice system is only one part of the government; and the government is only one part of society. In so far as crime is a social phenomenon, crime prevention is the responsibility of every part of society. The criminal process is limited to case by case operations, one criminal or one crime at a time."

Listed below are some of the conditions which affect the type and volume of crime that occurs from place to place:

Density and size of the community population and the metropolitan area of which it is a part.

Composition of the population with particular reference to age, sex and race.

Economic status of the population.

Relative stability of the population including number and ratio of seasonal visitors/residents, commuters and other transients.

Climate and seasonal weather conditions.

Educational, recreational and religious characteristics.

Standards governing appointments to the police force.

Policies of the prosecuting officials and the courts.

Attitude of the public toward law enforcement problems.

The administrative and investigative efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.

Organization and cooperation of adjoining and overlapping police jurisdictions.

# CRIME INDEX OFFENSES

The crime counts listed in this publication are actual offenses established by police investigation. When police receive a complaint of a crime and the follow-up investigation discloses no crime occurred, it is "unfounded". In 1995, police investigations that were "unfounded" represented 2 percent of the complaints concerning index offenses, ranging from 1 percent in the aggravated assault category to 13 percent in the rape category as compared to 1994, when there was 1 percent "unfounded" in the aggravated assault category and 14 percent in the rape category.

A total of 317,329 actual Index Offenses were reported to law enforcement agencies in Maryland during the calendar year 1995. This represents an increase of 4 percent when compared to the 1994 total of 306,441 Crime Index Offenses.

An analysis of Index Offenses by month in 1995 shows that August had the highest frequency of occurrence and February had the lowest. In 1994, August also had the highest frequency of occurrence and February the lowest.

The Crime Index Offenses represent the most common problem to law enforcement. They are serious crimes by their nature, volume, or frequency of occurrence. They are categorized as Violent Crime, which includes Murder, Forcible Rape, Robbery and Aggravated Assault, or as Property Crimes which includes Breaking or Entering, Larceny-Theft and Motor Vehicle Theft.

## VIOLENT CRIME

Violent Crimes involve the element of personal confrontation between the perpetrator and the victim; consequently, they are considered more serious than Property Crimes because of their very nature. These offenses accounted for 16 percent of the total Crime Index for 1995. In 1994, Violent Crimes accounted for 15 percent of the total Crime Index. Violent Crime increased 5 percent compared to 1994.

Analyzing the Violent Crimes by month reveals August had the greatest frequency of occurrence, while February had the lowest. In 1994, August also had the highest frequency of occurrence and February had the lowest.

## PROPERTY CRIMES

The number of Property Crimes reported during 1995, was more than 5 times greater than the number of Violent Crimes reported. As a group, Property Crimes made up 84 percent of the total Crime Index in 1995. In 1994, Property Crime made up 85 percent of the total Crime Index. Property Crime increased 3 percent in 1995. A monthly analysis showed August had the highest frequency of occurrence and February the lowest, the same as in 1994.

## RATES

Crime Rates relate the incidence of crime to the resident population. Many other factors which may contribute to the volume and type of crime in a given jurisdiction are not incorporated here, but are shown in the section entitled "Crime Factors".

In 1995, the Crime Rate for Maryland was 6,293.7 victims for every 100,000 population. This represents a 3 percent increase in the Crime Rate when compared to the 1994 rate of 6,121.5.

The 1995 Crime Rate for the Violent Crime group was 986.8 victims per 100,000 inhabitants, a 4 percent increase compared with the 1994 rate of 947.9. The Property Crime group had a rate of 5,306.9 victims, a 3 percent increase when compared to the 1994 rate of 5,173.5.

## CLEARANCES

For Uniform Crime Reporting purposes, a crime is cleared when police have identified the offender, have evidence to charge him and actually take him into custody. Solutions of crimes are also recorded in exceptional instances where some element beyond police control precludes formal charges against the offender, such as the victim's refusal to prosecute or local prosecution is declined because the subject is being prosecuted elsewhere for a crime committed in another jurisdiction. The arrest of one person can clear several crimes or several persons may be arrested in the process of solving one crime.

Maryland Law Enforcement Agencies cleared 21 percent of all Index Offenses reported to them in 1995, the same as in 1994.

The Violent Crimes recorded a 43 percent clearance rate in 1995 the same as in 1994. The Property Crime group experienced a 17 percent clearance rate in 1995 and 1994.

Considered individually the 1995 Violent Crime clearance rate was determined to be 69 percent of the Murders, 56 percent of the Rapes, 22 percent of the Robberies and 58 percent of the Aggravated Assaults. The Property Crime clearance rates were 16 percent for Breaking or Entering, 18 percent for Larceny-Theft and 12 percent for Motor Vehicle Theft.

The relatively high clearance rate for Violent Crimes as compared to Non-Violent Property Crimes is in part attributable to the volume difference between the two. Property Crime volume is much greater than that of Violent Crime and police investigation of Violent Crime is usually more intense. While the element of direct contact between the victim and perpetrator, as well as witness identification also contributes to this higher rate of solution for Violent Crime, stealth is involved to a greater degree in the Property Crimes.

## JUVENILE CLEARANCES

A juvenile clearance is the clearance of an offense in which all of the offenders involved were under the age of 18. If even one of the offenders was over 17 years of age, the clearance of that offense is not considered a juvenile clearance. In 1995, such juvenile clearances represented 19 percent of all clearances, compared to 21 percent in 1994.

Juvenile clearances in the Violent Crime category represented 15 percent of the total cleared in 1995 with 11 percent of all clearances in Homicide cases, 10 percent of those in Rape cases, 17 percent in Robbery cases and 15 percent in aggravated assault cases. Juvenile clearances were 16 percent of all clearances in the Violent Crime category in 1994.

In the Property Crime category, clearances involving Juvenile offenders represented 21 percent of the total cases cleared in 1995, with 16 percent of all clearances in Burglary cases, 20 percent of those in Larceny-Theft cases and 33 percent in Motor Vehicle Theft cases. Juvenile clearances were 23 percent of all clearances in the Property Crime category in 1994.

## STOLEN PROPERTY VALUE

The total value of Property Stolen during 1995 was \$413,628,596 which represents an 8 percent increase from 1994. Recovered Property amounted to \$151,201,111 which is 37 percent of the total stolen, resulting in a \$262,427,485 property loss to victims in the State of Maryland during 1995. This property loss represents a 14 percent increase when compared to the property loss in 1994.

### 5 YEAR TREND

	5 YEAR AVERAGE	1995	1994	1993	1992	1991
Stolen	366	414	384	344	347	340
Recovered	148	151	154	136	149	150
Value in Millions						

# MURDER

# MURDER

Murder and nonnegligent manslaughter is the willful (non-negligent) killing of one human being by another.

## VOLUME AND RATE

During 1995, a total of 596 murders were reported, this represents a 3 percent increase over 1994. Murder accounted for 1 percent of all violent crime and .2 percent of the crime index. In 1995, there were 11.8 murders per 100,000 population.

## ANALYSIS OF MURDER

In 1995, 410 murders were cleared with 11 percent of these clearances involving only juvenile offenders. A total of 697 persons were arrested for murder during 1995. A breakdown of persons arrested for murder was 93 percent male, 18 percent juvenile, 83 percent black, 17 percent white and less than 1 percent of other races.

During 1995, 248 of the murder victims were in the 30 and older age group representing 42 percent of the total.

Handguns were used in 66 percent of the reported murders in 1995. This represents a 3 percent increase in its use when compared to the handgun use in 1994.

The next most used weapon was a knife accounting for 14 percent of the reported murders in 1995. This represents a 16 percent increase compared to 1994.

Drug related murders accounted for 11 percent of the total. In 1994 drug related murders, accounted for 9 percent of the total.

Family members as offenders in murder accounted for 7 percent while boyfriend or girlfriend (those not cohabitating) reflects 3 percent of the total reported. There was a 27 percent decrease in family related murders while boyfriend or girlfriend murders increased 26 percent. Additionally, an acquaintance is listed in 23 percent of the murders reported in 1995. Strangers and unknown relationships accounted for two other large categories, 13 percent and 67 percent respectively.

In 38 percent of the murders, the offenders are unknown and not described. When the race of the victim and offender is known the offender is most often someone of the same race.

# **VICTIM, DESCRIBED OFFENDER RACE RELATIONS**

# LARCENY- THEFT

# LARCENY-THEFT

Larceny-theft is the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another.

## VOLUME AND RATE

During 1995, a total of 178,086 larceny-thefts were reported, this represents an increase of 6 percent over 1994. Larceny-theft accounted for 67 percent of the property crime total and 56 percent of the crime index. In 1995, there were 3,532.1 larceny-theft per 100,000 population.

## ANALYSIS OF LARCENY-THEFT

Of the total larceny-thefts reported, the highest percentage 25 were from motor vehicle while pocket-picking accounted for the lowest percentage .4..

In 1995, 32,422 larceny-theft offenses were cleared with 20 percent of these clearances involving only juvenile offenders.

A total of 33,097 persons were arrested for larceny-theft during 1995. The breakdown of persons arrested for larceny-theft was 72 percent male and 26 percent juvenile, 56 percent black, 43 percent white and 1 percent of other races.

Law Enforcement Agencies reported a total value of \$91,151,005 stolen in larceny-theft offenses.

## NATURE OF LARCENY-THEFTS

# MOTOR VEHICLE THEFT

# MOTOR VEHICLE THEFT

Motor vehicle theft is defined as the theft or attempted theft of a motor vehicle.

## VOLUME AND RATE

During 1995, there were 36,176 motor vehicle thefts reported, this represents a 5 percent decrease over 1994. In 1995, there were 717.5 motor vehicle thefts per 100,000 population.

## ANALYSIS OF MOTOR VEHICLE THEFT

During 1995, 81 percent of the motor vehicle thefts were automobiles, 16 percent were trucks and buses and 4 percent were other motor vehicles. There were 24,622 recovered vehicles accounting for 68 percent of the total reported stolen.

In 1995, 4,421 motor vehicle thefts were cleared with 33 percent of these clearances involving only juvenile offenders.

A total of 6,748 persons were arrested for motor vehicle theft during 1995. A breakdown of persons arrested for motor vehicle theft was 89 percent male, 50 percent juvenile, 75 percent black and 25 percent white.

Law Enforcement Agencies reported a total value \$236,061,468 stolen in motor vehicle thefts.

# ARSON

# ARSON

Arson is any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

## VOLUME AND RATE

During 1995, there were 3,119 arsons reported, this represents an 18 percent increase over 1994. In 1995, there were 62 arsons per 100,000 population. Of the total arsons, 48 percent were structures, while mobile accounted for 23 percent and other property accounted for 29 percent. Residential comprised 65 percent of the structures at which arson was directed, with 14 percent of all targeted structural property being uninhabited. The estimated value of property damage was approximately 22 million dollars.

In 1995, 489 arsons were cleared with 59 percent of these clearances involving only juvenile offenders.

A total of 635 persons were arrested for arson during 1995. A breakdown of persons arrested for arson was 81 percent male, 63 percent juvenile, 33 percent black, 66 percent white and 1 percent of other races.

# BATTERED SPOUSE

# BATTERED SPOUSE

## INTRODUCTION

The Maryland Battered Spouse Program was established through House Joint Resolution 32 which was introduced by Delegate Pauline Menes, requesting the Maryland State Police to maintain certain information on complaints of domestic assaults. The statistics in this report were collected from January 1, 1995 through December 31, 1995.

## DEFINITION

A Battered Spouse in the Maryland Uniform Crime Reporting (UCR) Program is considered to be:

1. A married person living with their spouse upon whom an aggravated or non-aggravated assault was committed by their mate.
2. A married person estranged from their spouse upon whom an aggravated or non-aggravated assault was committed by their mate.
3. A male and female not married to each other and who are living together or had lived together at some time, upon whom an aggravated or non-aggravated assault was committed by their mate.

## LIMITATIONS OF A BATTERED SPOUSE REPORTING PROGRAM

There are limitations to the information collected which should be clearly understood before any conclusions are drawn from the data presented in this report.

Procedures for handling non-aggravated spousal assaults vary between departments and counties of occurrence. In some instances, they are reported directly to the court system and not to a police department. They are often handled informally. Consequently, incomplete or inaccurate recording of the event may result.

While the current method of collecting Battered Spouse information for this report provides less than a complete picture, there is at present, no other informational system in general use gathering these statistics from police agencies that will more accurately perform this task.

## CLASSIFICATION

Aggravated assault, as defined under the Maryland Uniform Crime Reporting Program, is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or severe bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which would result in serious personal injury if the crimes were successfully completed. An assault in which hands, fists and feet are used and severe personal injury to the victim results, is also classified as an aggravated assault.

Any assault in which hands, fists and feet are used and no serious injury to the victim results, is classified as a non-aggravated assault.

## AGGRAVATED/NON-AGGRAVATED ASSAULT

During 1995, there were 24,021 spousal assaults reported representing an increase of 18 percent. A total of 3,769 spousal assaults were reported as aggravated. This represents a 17 percent increase over the 3,211 aggravated spousal assaults reported in 1994. Aggravated assaults were 16 percent of the total spousal assaults in 1995, as compared to 16 percent in 1994.

9:00 P.M.	1,523	1,257	1,287	1,159	1,212
10:00 P.M.	1,608	1,398	1,265	1,100	1,114
11:00 P.M.	1,647	1,363	1,309	1,196	1,261

Analysis: In the last five years over 50 percent of all spousal assaults have consistently occurred between the hours of 6:00 P.M. to 3:00 A.M. and over 48 percent during the three day period, Friday through Sunday. When combined this would indicate that most spousal assaults are likely to occur between 6:00 P.M. and 3:00 A.M. on Friday, Saturday and Sunday.

## VOLUME

A total of 24,021 spousal assaults were reported to Law Enforcement Agencies during 1995. This represents an increase of 18 percent when compared to 1994. Spousal assaults were 24 percent of the 98,290 total assaults reported to UCR in 1995.

## WEAPON USE IN SPOUSAL ASSAULTS

Firearms were 6.7 percent of the total aggravated assaults and 1.0 percent of the total assaults. In 1994, firearms were 8.5 percent of the total aggravated assaults and 1.3 percent of the total assaults.

Knife or cutting instruments were 28.5 percent of the total aggravated assaults and 4.5 percent of the total assaults. In 1994, knife or cutting instruments were 26.5 percent of the total aggravated assaults and 4.2 percent of the total assaults.

Other dangerous weapons were 47.0 percent of the total aggravated assaults and 7.4 percent of the total assaults. In 1994, other dangerous weapons were 44.3 percent of the total aggravated assaults and 7.0 percent of the total assaults.

Aggravated assaults by physical force were 17.8 percent of the aggravated assaults and 2.8 percent of the total assaults. In 1994, aggravated assaults by physical force were 20.8 percent of the total aggravated assaults and 3.3 percent of the total assaults.

Non-aggravated simple assaults accounted for 84.3 percent of all spousal assaults. In 1994, non-aggravated simple assaults were 84.2 percent of all spousal assaults.

1995	79.4%	18.4%	2.2%
1994	75.9%	22.1%	1.8%

## **VICTIM**

In 1995, the spousal assault victims were female in 81.3 percent of all cases as compared to 81.6 percent in 1994, a .4 percent decrease in the female victim ratio.

During 1995, 51.2 percent of the victims were white, 47.2 percent black and 1.6 percent were of other races. In 1994, 51.7 percent were white, 46.8 percent black and 1.5 percent were of other races.

Most victims of spousal assault are between 25 to 40 years of age, 63.7 percent in 1995 compared to 63.1 percent in 1994.

## **CLEARANCES**

There are two ways of clearing a case, one is by making an arrest and charging the person(s) with the offense. The second is known as an exceptional clearance whereby the police know the identity and location of the person(s) who committed the offense and have enough information to arrest them but there is some reason beyond their control that prevents them from making the arrest. The most frequent reason is the victims neglect or refusal to prosecute.

Of all spousal assaults reported in 1995, 81.6 percent were cleared, 38.0 percent by arrest and 43.6 percent exceptionally. In 18.3 percent of the incidents the dispositions of the cases were unknown. During 1994, 81.3 percent of all spousal assault cases were cleared, 31.7 percent by arrest and 49.5 percent exceptionally. In 18.7 percent of the cases, the dispositions were unknown.

## **RATIO OF SPOUSAL TO NON-SPOUSAL ASSAULTS**

The following chart reflects the ratio of spousal assaults as compared with the total of all (spousal and non-spousal) assaults. It also reflects the percentage of aggravated spousal assaults as compared with the non-aggravated spousal assaults. These comparisons are made on a State and County level.

# INDEX OFFENSE DATA

The tables contained within this section were designed to provide quick reference to statistical crime information relative to the different reporting areas of the State Of Maryland.

The tables are broken down by Region. Within each Region information is listed in County name sequence and is further detailed to show the activity experienced by individual police agencies. The general identifying descriptions which indicate the reporting areas are listed and defined as follows:

- |                                |                                                                                                                                                                                                                            |
|--------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Regional Total -               | This line indicates the total activity of all the Counties within the indicated Region.                                                                                                                                    |
| County Total -                 | This line indicates the total activity of all reporting Agencies within the indicated County.                                                                                                                              |
| Sheriff -                      | This line indicates the total activity reported by Sheriff's Offices. This includes activity which may have occurred within the corporate limits of towns in that County.                                                  |
| County Police Department -     | This line indicates the total activity reported by County Police Departments. This includes activity which may have occurred within the corporate limits of towns in that County.                                          |
| State Police -                 | This line indicates the total activity reported by all State Police installations within the indicated reporting area. This includes activity which may have occurred within the corporate limits of towns in that County. |
| Municipal - Police Departments | This line indicates the total activity reported by the specified police departments and includes only those crimes which were handled by that department.                                                                  |

The five regions used in the Maryland Uniform Crime Reporting Program are as follows:

Region I - Eastern Shore

Caroline County  
Cecil County  
Dorchester County  
Kent County  
Queen Anne's County  
Somerset County  
Talbot County  
Wicomico County  
Worcester County

Region II - Southern Maryland

Calvert County  
Charles County  
St. Mary's County

Region III - Western Maryland

Allegany County  
Carroll County  
Frederick County  
Garrett County  
Washington County

Region IV - Washington Metropolitan Region

Montgomery County  
Prince George's County

Region V - Baltimore Metropolitan Region

Baltimore City  
Anne Arundel County  
Baltimore County  
Harford County  
Howard County

Crime Rates for the individual agencies are not calculated in the following table because of overlapping jurisdictions in many cities of municipal, county and state law enforcement agencies. This table contains the offenses as reported by the individual agencies with crime rates for the county and region totals. Arson offenses in this table are listed opposite the agency reporting the Arson.\*

\*Arson figures included are not computed in the total offenses or crime rates.

# **MARYLAND**

# **ARREST DATA**

# ARREST DATA

The Maryland Uniform Crime Reporting Program requires the submission of monthly reports of persons arrested in the state. A record of arrest activity for both Part I and Part II crimes are received from state, county and municipal law enforcement agencies showing the age, sex and race of persons arrested. Traffic arrests, except Driving While Intoxicated, are not reported. A total of 286,831 arrests for Part I and Part II criminal offenses were reported during 1995. In 1994, there were 274,494 arrests which represents a 4 percent increase. Based on 1995 population estimates, there were 5,688.8 arrests per 100,000 population in Maryland. The arrest rate for 1994 was 5,483.3 representing a 4 percent increase in the arrest rate.

A person is counted on the monthly arrest report each time they are arrested. This means that a person may be arrested several times during a given month and would be counted each time. However, a person is counted only once each time regardless of the number of crimes or charges involved. A juvenile is counted as "arrested" when the circumstances are such that, if the juvenile were an adult, an arrest would have been counted or when police or other official action is taken beyond a mere interview, warning or admonishment.

Arrest figures do not indicate the number of individuals arrested or summonsed since, as stated above, one person may be arrested several times during the month. However, arrest information is useful in measuring the extent of law enforcement activities in a given geographic area as well as providing an index for measuring the involvement in criminal acts by the age, sex and race of perpetrators.

During 1995, 22 percent of all reported arrests were for Crime Index Offenses, compared to 23 percent in 1994. Analysis of Crime Index Arrest Data indicates that larceny-theft comprised the highest percentage of all arrests for Crime Index offenses, with 52 percent of the total in 1995, compared to 51 percent in 1994. The drug abuse, other assaults, driving under the influence and disorderly conduct categories continue to record the highest percentage of arrests for Part II offenses. These offenses accounted for 50 percent of the total arrests for Part II offenses in 1995.

	5 YEAR TREND					
	5 YEAR AVERAGE	1995	1994	1993	1992	1991
Juvenile	44,898	50,277	48,528	42,767	41,694	41,226
Adult	230,254	236,554	225,966	228,034	227,450	233,266
<b>TOTAL</b>	<b>275,152</b>	<b>286,831</b>	<b>274,494</b>	<b>270,801</b>	<b>269,144</b>	<b>274,492</b>

## **VIOLENT CRIME ARRESTS**

Arrests for crimes of violence accounted for 22 percent of the total arrests for Crime Index Offenses and 5 percent of the total arrests in 1995 compared to 21 and 5 percent respectively in 1994.

A further evaluation indicates that arrests for robbery and aggravated assault represented the highest percentage of the total arrests for violent crimes with 34 and 55 percent, respectively.

## **PROPERTY CRIME ARRESTS**

Property Crime arrests represented 78 percent of all arrests for Crime Index Offenses and 17 percent of the total arrests in 1995, compared to 79 and 18 percent respectively in 1994.

The highest percentage of property crime arrests, 67 percent, continues to occur in the larceny-theft category.

## **DRUG ABUSE VIOLATION ARRESTS**

Information pertaining to drug abuse violation arrests is collected according to specific drug categories and whether the arrest was for sale or manufacture or possession of a specific drug. During 1995, a total of 44,323 arrests for drug abuse law violations were reported compared to 1994 with 38,054 arrests, resulting in a 16 percent increase.

Evaluation of the reported data discloses that 33 percent of all persons arrested for drug abuse violations were under 21 years of age and 17 percent were under 18 years of age in 1995 compared to 33 and 16 percent respectively in 1994.

Analysis of individual categories showed that the highest percentage of arrests, which involved opium or cocaine and derivatives, was 59 percent in 1995 and 62 percent in 1994. Drug abuse arrest, for marijuana increased to 32 percent in 1995 from 29 percent in 1994. Of the total drug abuse arrests 61 percent were for possession while 39 percent were for sale or manufacture in 1995, compared to 61 and 39 percent respectively in 1994.

Possession of marijuana increased to 26 percent of the total drug abuse arrests in 1995, from 24 percent in 1994. Possession of opium or cocaine and derivatives represented 27 percent of the total drug abuse arrests in 1995, compared to 30 percent in 1994. Arrests for sale or manufacture of marijuana increased to 6 percent of the total drug abuse arrests in 1995 from 5 percent in 1994. Sale or manufacture of opium or cocaine and derivatives was 32 percent of the total drug abuse arrests in 1995, the same as in 1994.

# LAW ENFORCEMENT OFFICERS KILLED

Three law enforcement officers died in the line of duty in Maryland during 1995. The following summaries are based on information provided by their Agencies and the Federal Bureau of Investigation. The Federal Bureau of Investigation conducts in depth investigations of these tragic incidents in which law enforcement officers have made the supreme sacrifice in the performance of their duties.

## April 26, 1995

A Prince George's County Police Department Corporal was shot and killed at approximately 11:30 P.M. on April 26, 1995. The seven year veteran was off duty in uniform seated in his marked patrol car while working security at a restaurant. At that time, he was suddenly shot without warning. A suspect was subsequently apprehended and arrested.

## October 17, 1995

A Maryland State Police Trooper was shot and killed at approximately 12:50 A.M. on October 17, 1995 while conducting a traffic stop on U.S. Route 13 near Princess Anne in Somerset County. The seven year veteran was assisted by another Trooper who returned fire wounding one of the two subjects as they fled the scene. They were later apprehended. One pound of cocaine was found in their vehicle when searched.

## October 28, 1995

A 5 year veteran of the Maryland State Police died from injuries sustained in a vehicular accident that occurred at 3:45 A.M. on Route 213 in Cecil County. The Trooper was responding on a rainy night to a call for assistance from a Sheriff's Deputy, who was confronting a man with a gun.

# LAW ENFORCEMENT OFFICERS ASSAULTED

The following information is based on a detailed monthly collection of data in the Uniform Crime Reporting System regarding the problem of assaults on local, county and state law enforcement officers. The large number of reported assaults on sworn officers is in part due to a prevalent attitude of disrespect for law enforcement in certain elements of our society.

A total of 4,425 law enforcement officers in Maryland were victims of assault in the line of duty during 1995, compared to 4,178 assaults during 1994 resulting in a 6 percent increase.

The rate of assaults on law enforcement officers for the state was 33 assaults per every 100 sworn officers in 1995, compared to 31 in 1994.

Physical force was used in 85 percent of all assaults on police officers.

The greatest number of assaults 1,540 (35 percent) occurred while officers were responding to disturbance calls (family disputes, man with a gun, etc.), 29 percent of assaults on police officers occurred between 10:00 P.M. and 2:00 A.M.

A total of 4,303 assaults on law enforcement officers were cleared during 1995 amounting to a 97 percent clearance rate.

# **LAW ENFORCEMENT EMPLOYEE DATA**

## **POLICE EMPLOYEE DATA**

The Uniform Crime Reporting Program in Maryland incorporates the collection of pertinent data relating to the police of the State. Information regarding police employee strength is discussed in this section.

This information is submitted by county, municipal and state law enforcement agencies and compiled on an annual basis. Specific information concerning the number of law enforcement employees reflects the status as of October 31, 1995.

## **LAW ENFORCEMENT EMPLOYEE RATES**

In 1995, the average number of full-time law enforcement employees (state, county and municipal) including civilian employees, amounted to 3.4 for each 1,000 inhabitants of the state. The rate based on sworn personnel only (excluding civilians), amounted to 2.7 per 1,000 population. In 1994, the average number of full time law enforcement employees amounted to 3.4 for each 1,000 inhabitants, and 2.7 sworn personnel per 1,000 inhabitants of the state.

The ratio of law enforcement employees per 1,000 population in any given area or municipality is influenced by a number of factors, much the same as the crime rate. The determination of law enforcement strength for a given county or municipality is based on factors such as population density, size and character of the community, geographic location, proximity to metropolitan areas and other conditions which exist in the area generating the need for law enforcement services. Employee rates also differ among agencies since, in particular, there is a wide variation of the responsibilities and level of activity within various law enforcement agencies. The information in this section relates to reported police employee strength and should not be interpreted as recommended strength for any area.

## **CIVILIAN EMPLOYEES**

The personnel of each law enforcement agency differ as to the demands and responsibilities placed before them. Many police officers are fully occupied with clerical tasks and are not free to perform active police duties. Some police administrators use civilians in this capacity, thus freeing the sworn personnel for actual police related services.

As of October 31, 1995, 3,967 or 23 percent of the total number of police employees in Maryland were civilians.
